Dataset 1: (Collection of data published/archived together)

Short description of data:

Origin of data (institution):

(3rd party) Software used:

☐ additional information included as README with data

Data availability:

☐ published at (DOI)

☐ on reasonable request, to corresponding author. Data is archived:

☐ according to local policy at institution (as provided).

☐ other (Please provide details: location, accessible by, ...)

Source availability: (own software or scripts, used to generate/process data)

☐ published at (link)

☐ archived/published with data   ☐ archived according to local policy at institution (as provided)

☐ other (Please provide details: location, accessible by, ...)

Dataset 2: (Collection of data published/archived together)

Short description of data:

Origin of data (institution):

(3rd party) Software used:

☐ additional information included as README with data

Data availability:

☐ published at (DOI)

☐ on reasonable request, to corresponding author. Data is archived:

   ☐ according to local policy at institution (as provided).

   ☐ other (Please provide details: location, accessible by, ...)

☐ archived/published with data   ☐ archived according to local policy at institution (as provided)

☐ other (Please provide details: location, accessible by, ...)

Local policy at the I. Institut für Theoretische Physik, Universität Hamburg:

Published data from all project-related peer-reviewed publications, including documentation and source codes are permanently stored on a specific project account at the local high-performance compute center "PHYSnet" at the Department of Physics, University of Hamburg. Data access is provided on request via the authors of the respective publication.
